- Environmental Management Program (EMP) Development & Implementation
- Environmental Management Systems (EMS) (ISO 14001)
- Environmental Capital Improvement Planning
- Environmental Management Information Services (EMIS)
- Pollution Prevention & Waste Minimization
- Emergency Response Plan Preparation
- SPCC Plan Preparation
- EPCRA Reporting - SARA Title III & TRI
- Training & Auditing

## Environmental Management Services

Volvo Trucks of North America (National)

- Provided in-house environmental management services for 3 years
- Developed an Environmental Management Program (EMP) for implementation at all company-owned truck maintenance and retail facilities
- Developed an internal due diligence standard and performed due diligence at more than 20 facilities across the United States
- Provided HAZCOM and waste minimization training at multiple facilities in the western United States

## Environmental Capital Improvement Planning

Major Pharmaceutical Production Facility (Southeast US)

- Developed an Environmental Master Plan to help plan capital investment requirements for the local facility over a five year period
- Identified the drivers appropriate to meet the requirements
- Outlined capital projects in the areas of Solvent Management, VOC Management, Wastewater Treatment and Energy Management

## EPCRA Section 313 TRI Report Preparation

Heavy Equipment Manufacturer (Tennessee)

- Estimated quantities of reportable wastes generated by shot blasting, welding, painting and sanding operations
- Prepared TRI Form R reports for current and previous years within a compressed time frame

## Environmental Compliance Audit of Fleet Management Yard

Salt Lake City Public Services Department (Utah)

- Reviewed regulatory records, interviewed personnel and evaluated vehicle painting, fueling, maintenance and washing operations
- Assessed the facility's compliance with state and federal regulations pertaining to air quality, wastewater, storm water, petroleum products and hazardous waste
- Developed and implemented a training plan to bring the facility into full compliance with all applicable environmental regulations
