

Environmental Management Program (EMP)

An EMP is **critical** to any facility handling, storing or disposing of hazardous waste, petroleum products or industrial wastewater. Our EMP is a comprehensive set of tools designed to put you on the road to self-sufficient compliance with the environmental regulations that pertain to your operation. What can our EMP do for your organization?

- Protect employees & property
- Minimize legal exposure
- Reduce wastes & overall operating costs
- Address issues before they become problems
- Systematically & cost effectively manage environmental aspects
- Limit financial liability

Key Projects

Volvo Trucks of North America

- Developed a customized EMP for 500 Volvo/Mack Truck Dealerships across the US and Canada
- Performed live training sessions for Volvo/Mack Service, Parts & Body-shop Managers with over 25 classes
- Created a web-based interactive training course for environmental coordinators & an awareness training for all dealership employees
- Produced Guidance Document and Resource Manual for easy access to regulations, BMPs, forms, flowcharts, & EPA lists necessary to implement the EMP

Coca-Cola Enterprises Inc.

- Created a baseline survey for Fleet shops to determine environmental aspects & impacts
- Developed a customized, state-specific EMP to address systematic non-compliance issues identified during the survey analysis
- Produced a convenient pocket guide for technicians covering daily operating procedures
- Conducted a multi-phased pilot program to assess the optimal training platform for Fleet managers & supervisors
- Created a graphical training program with an emphasis on regulatory requirements and company policies
- Implemented a nationwide training program for 210 Fleet shops
- Performing virtual & in-person site inspections

What is the MSE EMP?

TOOLS

Guidance Manual

A reference/workbook for training detailing industry-specific aspects, regulations & BMP's in plain language; includes worksheets, flowcharts & templates

EMP Training

Comprehensive, entertaining training courses customized for all personnel, depending on their level of responsibility

Quick Reference Aids

At-a-glance posters & convenient pocket guides highlighting BMPs & company policy for significant aspects to reduce impact

Training & Compliance Tracking

Internet/intranet accessible database tailored for tracking all environmental activities & requirements

- Comprehensive, easy to follow reference materials designed to create environmentally self-sufficient & sustainable operations throughout an organization
- Multi-format (in-person, webinars, CD-ROM, internet/intranet) training courses with specifically designed educational courseware that is engaging, entertaining & concise
- Customizable tools to build an EMP that is compatible with any existing Environmental

Let MSE be your partner in implementing an EMP that will become a valued part of your everyday business practices.

FOCUS AREAS

Hazard Communication

Employee & community right-to-know & health & safety

Hazardous Waste Management

Profiling, inventorying & regulations (RCRA/CERCLA) for storage, transport & disposal

Petroleum Products

New & used oil handling, storage & disposal requirements (SPCC)

Industry-Specific Waste Streams

Solid & universal waste requirements for common liquid & solid wastes

Industrial Wastewater/Storm

Water Management

Permits, plans & BMPs

Air Quality Compliance

Regulations, permits & exemptions
