

MSE

Millennium Science & Engineering

*Environmental science and engineering solutions
for the twenty-first century*

Introducing MSE

Millennium Science & Engineering (MSE) is a premier international environmental consulting science and engineering firm. We provide our private, industrial and governmental clients with cost-effective solutions to their environmental challenges for the 21st century. As an employee-owned firm, MSE places high priority on the development and advancement of its employees. MSE provides services in all major environmental disciplines. We specialize in conducting challenging and complex projects worldwide.

From our offices in the United States and the United Kingdom, MSE offers innovative consulting science and engineering services, and project and program management to clients worldwide, who face continual changes to the environmental regulatory landscape and additional cost pressures.

North American and International Experience

MSE has completed projects in essentially all areas of the United States and Canada as well as more than 45 other countries throughout the world in recent years. Our international experience includes projects in Latin America, Europe, Asia, Australia, the Middle East, and Africa. In addition to our offices in the US and UK, MSE maintains an association with numerous local engineering firms throughout the world with whom we join forces for major local projects.

The principals and staff of MSE have provided environmental consulting engineering and science services to thousands of clients since the late 1960s.

Service Areas

- Air Quality and Pollution Control
- Construction Management Services
